OPENING CHECKLIST

- ☐ Unlock metal window guards using the key from the lockbox. Place the metal locks in the drawer underneath the register labeled “locks.” To avoid losing the key or getting locked out of the Snack Shack, immediately place the key back into the lock box and scramble the code.
- ☐ Pull the utensil/ condiment cart outside of the Snack Shack and place it by the pick-up window. It should be stocked, but if it is not, most items can be found in the supply closet.
- ☐ Tap the register to turn on the screen – please see “Register Operation” sheet in binder for more detailed operation information.
- ☐ Plug in all appliances as needed. We recommend plugging the microwave into the wall outlet closest to the refrigerator, so the power strip is not overloaded.
- ☐ If using the Food Warmer below the counter, use the extension cord plugged in below the register.
